

Aracari Bandjoukri Project, Cameroon

Shear zone hosted gold prospect, Tchollire-Banyo shear zone

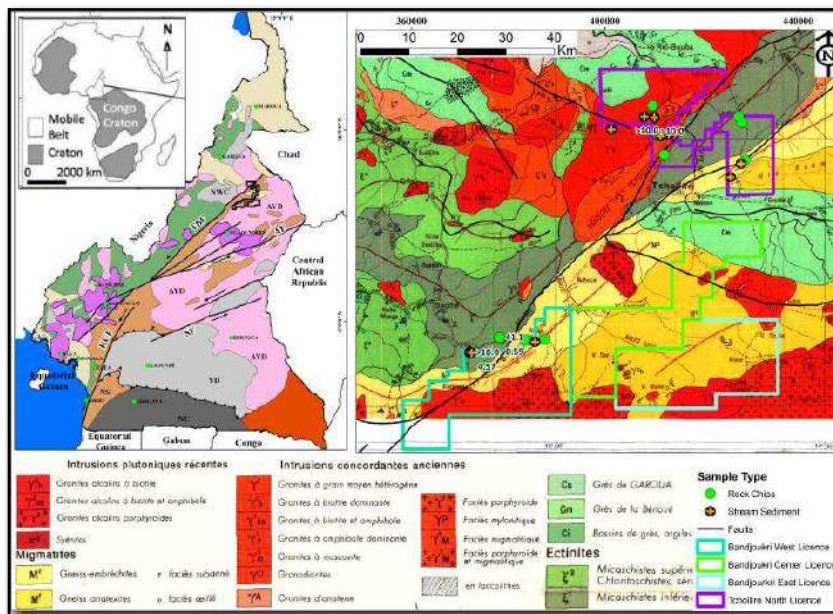

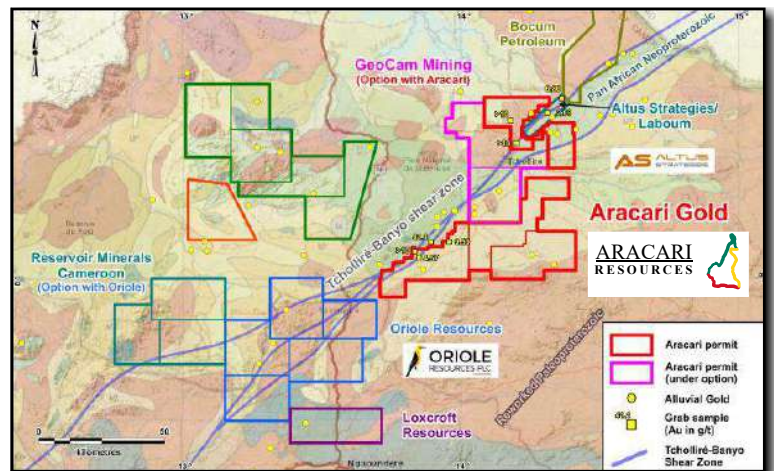

From Concept

- Identification of prospective grassroots gold exploration ground in Cameroon
- Orogenic Lode Gold
- Regional to Country scale Tchollire Banyo Shear Zone a well-known gold bearing structure
- Licenced area between Altus Strategies and Oriole Resources PLC

Licence Applications

- Located in the north central part of Cameroon
- Four licences issued
 - Bandjoukri West 496 km²
 - Bandjoukri Central 499 km²
 - Bandjoukri East 493 km²
 - Tchollire Nord 460 km²
- Total Area 1,948 km²
- All licences issued initial 3 Years + 3 x 2-year extensions
- Cameroon has a pro-mining investment outlook

Regional Geology

- Neoproterozoic greenstone belt rocks
- Associated with major, deep-tapping crustal lineaments
- Prospective for orogenic lode gold mineralization
- Bandjoukri district altered quartz veins are locally mined and crushed for gold recovery

Shear zone hosted gold prospect, Tchollire-Banyo shear zone

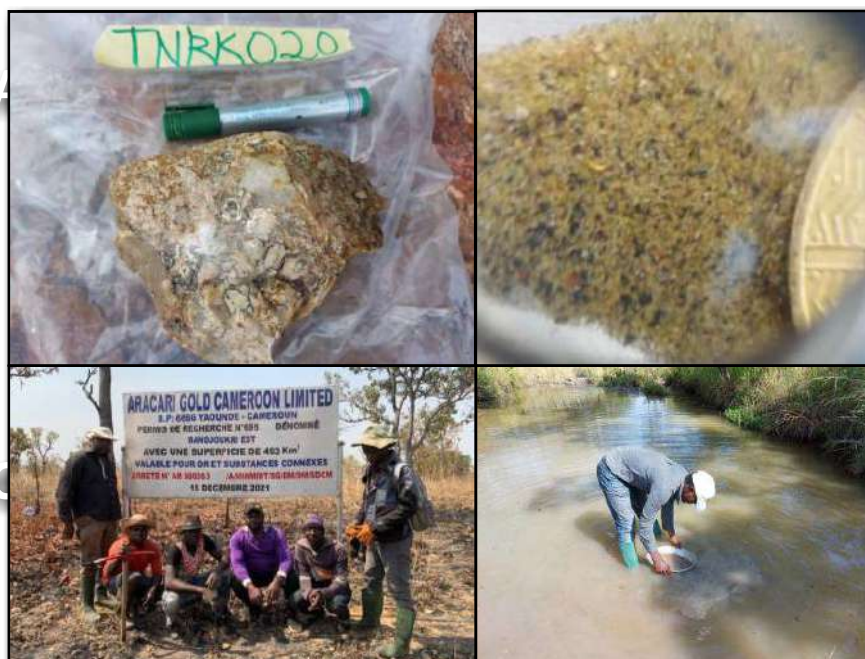

Stage 1 Planned Work

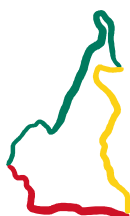

- Prospecting
- Geological mapping
- Stream sediment survey
- Assess regional geophysics
- Soil geochemistry
- Trenching / Drilling

Work Completed

- Technical work programme approved with Ministry of Mines
- Data compilation
- Initial site visit and sampling completed in December 2022
- Best results from grab samples at three separate areas of artisanal workings: 7.9 g/t Au, 7.1 g/t Au, and 3.6 g/t Au
- Follow-up work program being planned

ARACARI RESOURCES

Aracari Resources owned 50% by Aurum Discovery (Ireland) and Global Acquisitions Limited (Cameroon)

Project Status: Open for investment

- The Bandjoukri Project is an excellent first mover opportunity,
- Operating with an adept, highly experienced technical team with complimentary business skill-sets and experience, locally & globally
- Currently seeking a funding partner through a suitable transaction
